SUMMARY:

My skills are most advanced in application / web development designing database driven applications utilizing Microsoft Core Technologies with a concentration on Rich Client Technologies utilizing JavaScript / JS Frameworks, AJAX with RESTful services, most recently in a Dev Lead position.

EXPERIENCE:

5/2014 - Current Dev Lead	B2W Software, Inc. Portsmouth, NH
-------------------------------------	--

Hold the position of Dev Lead. My primary responsibilities involve all technical design, development and implementation of multiple B2W Software products across multiple teams on and off shore. I am also responsible in some capacity for resource management, project life cycle, SCRUM Master, Build / Deploy Processes, development lifecycle and processes. Also, managed and oversaw set up of technologies at company user conferences.

Core Technologies Used: .NET, C#, Web API, Entity Framework, JavaScript, Kendo UI, Angular

9/2007 - 5/2014 IT Lead	Health Dialog, Inc. Manchester, NH
-----------------------------------	---

Held the position of IT Lead. My primary responsibilities involve all technical design, development and implementation of internal enterprise frameworks as well as forward facing internet applications build on top of SharePoint 2007 / 2010, MVC.NET & ASP.NET. Architected an enterprise wide federation SSO solution to connect internal applications with external partners and clients (fun stuff!).

Core Technologies Used: .NET, C#, SharePoint 2007 / 2010, JavaScript, JQuery, WCF, MVC, Kendo UI

4/2007 - 9/2007 Microsoft Developer	PC Connections Merrimack, NH
--	---

Held the position of Microsoft Developer. My primary duties include application/service development implementing a SOA architecture using Windows Communication Foundation written in C#. Also had been responsible for developing K2.NET workflow solutions.

Core Technologies Used: Visual Studio 2005, TFS, Visual C#, .NET 2.0, MS SQL Server 2005, K2.NET, Windows Communication Foundation

11/2005 - 4/2007 Application Developer	Russound, Inc. Newmarket, NH
---	---

Held the position of Application Developer using Microsoft's Core Technologies including C#, ASP.NET in C#, OOP n-tier applications for Web and Win Forms. I was involved in all phases of development from concept to implementation. Duties also include Database Administration as well as SharePoint administration, design and implementation.

Core Technologies Used: Visual Studio 2005, TFS, Visual C#, .NET 2.0, MS SQL Server 2005, SharePoint 2003, CorasWorks

7/2004 - 11/2005 IT Consultant	Fulfillment Solutions, Inc. Dulles, VA
---	---

Provided part-time IT consulting services for developing and maintaining internal IT business processes. Range of consulting included developing web applications for B2B order processing, back-end functionality to complete order process and networking services for a mixed Windows 2003 and 2000 environment.

Core Technologies Used: Visual Studio 2003, Visual Basic, .NET , Classic ASP, MS SQL Server 2000

11/2004 - 11/2005 Owner / President	Webwires, Inc. Manassas, VA
--	--

Owned and operated a small private Web Development and Network Maintenance company for companies based in the Metro D.C. Area. Designed and developed data-driven company websites and provided IT support for Windows based networks.

Core Technologies Used: Visual Studio 2003, Visual Basic, .NET, Classic ASP, MS SQL Server 2000, MySQL 4-5

3/2001 - 11/2004 Development Engineer	MP Computer Consultants, Inc. Lansdowne, VA
--	--

Held the position of IT solutions developer utilizing Microsoft line of products including MS Server 2000 & 2003, MS SQL2000, IIS 5, Visual Basic 6.0 and ASP(Classic and .NET 1.1). Other duties include Web and software development, graphic design using Photoshop and web animation using Flash. Other duties included light network administration.

Core Technologies Used: Visual Studio 2003, Visual Basic, .NET 1.1, Classic ASP, MS SQL Server 2000

8/1998 - 3/2001 Technology Manager	Gooder Group Fairfax, VA
---	---

Held the position of Technology Manager, managing the development of the company's website written in Classic ASP. Designed and implemented online web products that were written in Perl/CGI. Also handled network administration in an Microsoft Server environment.

Core Technologies Used: Classic ASP, Perl/CGI, MS SQL Server 2000 & 7
